EXPERIENCE

ManoMano

Staff Software Engineer
may 2022 - today

Senior Frontend Developer
july 2020 - april 2022

Frontend developer
december 2018 - june 2020

I am part of the ManoMano core team and I support the teams of front-end developers in their daily work as technical referent.

I put in place the new front-end stack of the website during its last redesign as well as all the necessary tooling and documentation for developers to work in good conditions.

I'm actively working on things like improving site performance, speeding up CI/CD, and improving developer life which is my favorite part.

Technologies used: React, Next.js, Jest, React Testing Library, Redux, Docker, Kubernetes, Gitlab CI.

GE Healthcare

Software engineer
october 2015 - november 2018

I worked on the frontend part of an SDK that aims to facilitate the creation of applications to visualise DICOM medical images.

My responsibilities were: participating in the design, writing specifications, planning, implementing, documenting, testing (unit, integration), writing technical documents.

Technologies used: AngularJS, TypeScript, Protractor, Git, Webpack, Docker, Jenkins.

EDUCATION

EIGSI La Rochelle

General engineering degree
2012 - 2015

MAIN SKILLS

JavaScript, TypeScript, React, Node.js, Git, Docker.
